

Package ‘aNEMOne’

April 26, 2015

Title Create Nemo input files and analyze Nemo output files.

Version 0.1

Date 2015-04-26

Author Kimberly J. Gilbert

Maintainer Kimberly J. Gilbert <kgilbert@zoology.ubc.ca>

Description

Contains functions to create a Nemo .init file from specified parameters, including creating of dispersal kernels and connectivity matrices based on landscape size and the sigma value of the kernel. Additional functions allow quick analyses of Nemo stat outputs.
